July 21, 2008

Dear Property/Business Owner:

RE: Hanover Industrial Air Park Sewer Rehabilitation; Project # 1946TL

On Friday August 1, 2008 the Hanover County Department of Public Utilities will be receiving bids for work to rehabilitate various portions of the sanitary sewer system in the Hanover Industrial Air Park. It is anticipated that the actual work would begin near the beginning of September. We expect that all work, including any required restoration, will be substantially complete within 120 days of the contractors start.

Due to your close proximity to this project and the possibility that you may be impacted by the construction activities during the duration of the project, we are providing you this notice. The actual limits of the project are shown on the attached reference.

The majority of the planned work will involve trench-less technology meaning that there are a very limited number of repairs and adjustments that will necessitate pavement, or other surfaces, destruction and subsequent restoration.

In order to provide the necessary safety zone for the work to be performed there will be various traffic control measures implemented that may impact your ability to travel on certain streets during the performance of this work by the contractor(s). All traffic measures will be in compliance with the requirements of the Virginia Department of Transportation (VDOT) and will be done in such a manner as to attempt to minimize any disruption to traffic and access.

The work hours will be restricted to hours between 7:00 a.m. and 6:00 p.m. Monday through Friday with any work in the roadway limited to the hours of 9:00 a.m. to 4:00 p.m.; barring any unforeseen circumstances. While we anticipate minimal disruption to your business, we apologize in advance if this causes any inconvenience.

Any work that would have a direct impact on you or your business will be coordinated by our contractor to ensure that you are not unreasonably inconvenienced.

Signs will be posted within the project limits that provide the appropriate contact information as well as the project name and applicable references.

If you require any further information please contact the Hanover County Department of Public Utilities at 804-365-6019 or the project managers: Matt Ellinghaus (365-6701) or Scott Yates (365-6054).

We sincerely thank you for your understanding.
